The amendment filed on October 16, 2003 has been entered. By this amendment, claim 2 has been canceled, and claims 1, 3-6 are now pending in the application. Among the pending claims, non-elected claims 1, 5-6 have been withdrawn from consideration.

### Ex Parte Quayle

1. This application is in condition for allowance except for the following formal matters:

## Claim Objections

- 2. Claims 3-4 are objected to because of the following informalities:
  - a. In claim 3, line 8, the claimed "if there is to change in the learned value" should be corrected to "if there is <u>no</u> change in the learned value", since according to the specification page 13, lines 19-20, the counter is counted up when there is <u>no</u> change in the learned value.
  - b. In claim 4, line 8, the claimed "if there is to change in the learned value" should be corrected to "if there is <u>no</u> change in the learned value" as explained in claim 3 above.

#### Allowable Subject Matter

3. Claims 3-4 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.

Application/Control Number: 09/964,698

Art Unit: 3661

4. The following is an examiner's statement of reasons for allowance:

Prior arts of record does not teach an abnormality detecting apparatus for an automatic speed changer set forth in claims 3-4. Specifically, prior arts of record does not teach a learned value change supervision controlling means and an abnormality detection controlling means; the learned value change supervision controlling means supervises a change in the learned value of the learn controlling means, if there is no change in the learned value, the learned value change supervision controlling means counts up the learned value non-change counter, the learned value change supervision controlling means stores the learned value as converged when the value of the learned value nonchange counter is not less than a predetermined value; the abnormality detection controlling means determines and stores a condition as abnormal when the learned value is changed again after the judgment that the learned value change has been once converged by the learned value supervision controlling means. Further, according to claim 3, the abnormality detection controlling means set a threshold value after the convergence of the learn when a predetermined threshold value after the convergence of the learn has not been set, and if the threshold value after the convergence of the learn has been set, the abnormality detection controlling means stores a condition as being abnormal when the current learned value exceeds the set threshold value after the convergence of the learn. And according to claim 4, the abnormality detection controlling means judges whether the change direction of the learned value of the current case is the same as or reverse to that of the previous case, the abnormality detection

Application/Control Number: 09/964,698

Art Unit: 3661

controlling means counts up a learned value change direction reversing number counter

Page 4

when the change direction is reverse, and the abnormality detection controlling means

stores the condition as abnormal when the value of the learned value change direction

reversing number counter is not less than a predetermined value.

Remarks

Non-elected claims 1, 5-6 should be formally cancelled, and should be explicitly stated in

the "listings of claims section" in the next correspondence.

Prosecution on the merits is closed in accordance with the practice under Ex parte

Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO MONTHS

from the mailing date of this letter.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 305-7687, (for formal communications intended for entry)

Or:

Art Unit: 3661

(703) 305-7687 (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park V, 2451 Crystal Drive, Arlington. VA., Seventh Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thu Nguyen whose telephone number is (703) 306-9130. The examiner can normally be reached on Monday-Thursday from 8:00 am to 6:00 pm ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Cuchlinski, can be reached on (703) 308-3873. The fax phone number for this Group is (703) 305-7687.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703)308-1111.
